Date Available: January 22, 2010

The Hubbard Group is a holding company comprised of two of the most dominant heavy construction firms in the southeastern United States, Hubbard Construction and Blythe Construction. Together, we rank as America's 14th largest domestic heavy construction company with combined revenues of \$450 million.

Our list of services includes complex highway projects, site development, paving, utility and drainage systems, surveying and state of the art bridge building. The Hubbard Group companies can provide multiple delivery systems in design-build, bid-build, public-private-partnerships and design-build finance. The Hubbard Group can take your job from the design stage to the final layer of asphalt. Click on the links above to find out more about Hubbard Construction and Blythe Construction.

Hubbard Group is part of Eurovia, the European leader in road construction, and a division of Vinci.

We are Equal Opportunity Employers and promote a Drug-Free Workplace.

All applicants are required to apply on our web site at www.hubbard.com which is available 24 hours day - 7 days a week. Due to the large volume of applicants, Hubbard Construction Company's Human Resource Department will be able to contact only those applicants in whom there is an interest.

Description

Senior Estimator – Heavy Highway

This position within the Estimating Department at Hubbard Construction Company will have at least 10 years of civil construction estimating experience, with an emphasis on highway interchanges, drainage systems, roads, and bridges. There are two positions currently located in West Palm Beach, Florida and Miami, Florida.

Qualification Requirements

-- General. To perform this job successfully, an individual must be able to perform each Key Duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Physical Demands

The following physical demands are representative of those that must be met by a Senior Estimator to successfully perform the essential functions of this job. - Regularly required to sit and/or stand during a regular work shift of at least eight hours per day. - Employee is occasionally required to stoop, bend, walk, crouch, and climb. - Ability to lift, on a frequent basis, at least 25 pounds and carry up to 15 pounds. - Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and ability to adjust focus. - Continuous mental attention required to complete tasks in an efficient manner.

-- Work Environment. The work environment characteristics described below are representative of those that a Senior Estimator encounters while performing the essential functions of this job. - Work is performed indoors. - The noise level in the work environment is usually moderate.

Education and Experience.

This position typically is not an entry-level job, as it requires demonstrable previous experience as an Estimator. A four-year degree in Construction Management, Civil Engineering or equivalent required. Must be able to understand work directions and communicate effectively with management and fellow employees. Experience working for a General Contractor as an estimator bidding on DOT or heavy highway projects between \$5M and \$50M required. This position requires you to be experienced in estimating bridges and /or grading and utilities of D.O.T.

projects. Typical projects are bridges, interstate rehabs, highway replacements, concrete paving, and airport projects. Valid Florida driver's license and satisfactory driving record.

Experience
Key Duties

-- This is a senior level estimator position. Experience working for a General Contractor as an estimator bidding on DOT or heavy highway projects required. -- Estimating projects which typically range from 5 million to 50 million dollars. -- Estimating self-performed work and pricing the labor, equipment, and material costs. -- Working knowledge of construction assemblies and all project phases. -- Ability to produce accurate estimates from conceptual and schematic drawings. -- Ability to produce detailed, final contract estimates. -- Ability to assess site exposures/construction risks and be able to appropriately analyze cost and reflect these in an estimate. -- Ability to identify constructability issues through the estimating process. -- Ability to identify value-engineering alternatives. Ability to work as a team. -- Ability to read, write and communicate effectively. -- Working experience on HCSS software a plus. -- Travel within Florida may be required.
